Objective

I am a self taught fullstack software developer focusing on svelte for front end development and laravel for backend development while communicating with the two through inertia js thus creating an highly productive and fast monolithic work environment .I'm currently seeking employment with a fast-growing startup and organizations. I bring more than four years experience writing JavaScript and more than four years experience in the technology industry.

Experience

- **Freelancing** 2020 - Present
Svelte front end Web developer
I worked with clients to design responsive and high performance user interfaces .

I worked with clients to convert theirs designs into code and reusable components .

I worked with clients to convert their legacy codes to new and productive solutions /framework like svelte
- **Freelancing** 2019 - Present
Laravel backend developer
I worked with clients to design and architect their business backend logic .

Maintenance and creating scalable data structures and databases for their web application .

I help in the design of business and backend logic for their day to day web app usage

Help to create and add functionalities to their laravel admin to automate common activities
- **Freelancing** 2019 - Present
